

Custom Label Applicator

This is how we roll

The most affordable, fastest, and innovative manual label applicator on the market.

Advantages of owning a Custom Label Applicator

- The Custom Label Applicator is the most affordable bench-top labeler on the market. Saves considerable time and money over hand labeling.
- Applies front and back pressure-sensitive labels to bottles, cans and canisters with speed and precision.

See what Momentum Development can do for you

Visit our website for more information, product demonstration videos, dealer info and pricing.

Contact Momentum Development to see how we can provide a unique solution for label application on odd-shaped packaging.

Requires no electricity. No motors to wear out. Quiet.

Precise. Place your labels exactly where you want them to be. Every time.

Engineered and manufactured in the USA from durable, quality components.

While the Custom Label Applicator is designed to accommodate round containers, MDI can customize to meet your specific requirements.

How the Custom Label Applicator works

- ↺ Simply feed a roll of labels through the machine.
- ↺ Place the item to be labeled on the rollers.
- ↺ Set the stops on the machine for a single label or front and back labels.
- ↺ Push the carriage forward.
- ↺ Remove the item from the rollers.
- ↺ Pull the carriage back and place the next item on the rollers.
